What is a portable power station?

Portable power stations are basically large batteries in protective boxes, with AC outlets and other charging ports built in. They're generally much bigger, heavier, more powerful, and more rugged than power banks and portable laptop chargers.

What is the best portable power station?

Plus, it has more AC, USB-A, and USB-C ports than most portable power stations we've tested. Offering plenty of power and ports in a compact package, the Jackery Explorer 1000 is the best portable power station for emergency backup power or outdoor activities such as camping and tailgating. It has great battery life.

Can a portable power station run a home if the grid goes down?

Smaller portable power stations might not be able to run your home when the grid goes down, but they can be plenty helpful on camping trips or remote work excursions. These typically will offer between 300 and 600 watt-hours of juice and will put out close to the same figures in output watts.

Are portable power stations safe?

Portable power stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping. And since they have no motor, you don't need to keep gas handy or perform the oil changes and other minor maintenance that a combustion engine requires.
