Hanhai Hydrogen Energy low-pressure liquid hydrogen storage materials and high-end equipment manufacturing base project: The project has a total investment of 3 billion yuan, and the first phase will build a hydrogen energy technology research and ...

XI'AN, China, March 24, 2023 /PRNewswire/ -- In 2022, the number of new technology-based enterprises in Xixian New Area was 1.8 times that of last year, of which the number of new enterprises developed based on sci-tech achievements was 2.5 times that of 2021. The new area identified 490 high-tech enterprises, 2.2 times that of the previous year, according to Xixian ...

Utilizing a system design by Energy Dome, this innovative and efficient approach to long-duration energy storage is both simple and sustainable. The Columbia Energy Storage Project will take energy from the grid and store it by converting CO₂ gas into a compressed liquid form. When energy is needed, the system converts the liquid CO₂ back to a gas, which powers a turbine ...

Xixian new energy storage project

On the morning of January 4, 2022, the Xiamen new airport project on Dadeng Island, Xiang'an District, Xiamen City, started construction. This time, a total of 8 projects in the Xiamen New Airport area have been intensively started, with a total investment of over 62 billion yuan, covering three major categories: aviation industry, infrastructure and social undertakings.

Eni New Energy US has bought a large-scale battery storage project in development in Texas from developer Baywa r.e., along with a utility-scale solar PV plant nearby. The 200MW/400MWh battery energy storage system (BESS) project is at a late stage of development and scheduled to go into operation before the end of next year.

Xixian New Area attaches great importance to the development of the hydrogen energy industry. As of now, the area has attracted and established 43 enterprises in the hydrogen energy industrial chain. The hydrogen-related projects will play a significant role in strengthening and expanding the hydrogen energy industrial chain in the new area.

Longi said its HPBC 2.0 cell technology, launched in early 2024, is now ready for mass production. It said it plans to invest about CNY 3.21 billion (\$442 million) in a new project in Xixian New ...

2024.10.09 10:18 [Qiongzhou Strait transportation new energy vehicle ship successfully docked] On the afternoon of October 8th, under the on-site escort of the Guangdong Zhanjiang Maritime Bureau's "Haixun 0927" ship, the first flatbed cargo ship dedicated to the transportation of new energy vehicles in the Qiongzhou Strait, the "Green Source No. 1" ship, slowly entered the ...

LONGi Green Energy announced on Tuesday it has signed an investment agreement to build a 100 GW mono wafer facility and a 50 GW mono cell facility in Xixian New Area, a development zone in Northwest China's Shaanxi province.. The agreement has been signed with the management committees of the new area. In line with LONGi's production ...

New energy storage refers to ways of storing energy other than pumped-storage hydroelectricity, with electrochemical energy storage, represented by lithium-ion batteries, being the mainstay ...

On September 8, 2021, the Shaanxi Provincial Public Resources Trading Center announced the winning bid for the construction of units 05 and 09 in the starting area of China Silk Road Science and Technology Valley, Xixian New District. Shaanxi Construction Engineering Fengxi Construction Co., Ltd. won the project for 2.86 billion yuan. .

In the first quarter of 2022, Xixian New Area signed 48 projects through the combination of online and offline channels, with a total investment of RMB 86.046 billion, and introduced ten Fortune ...
